To whom it may concern, re: Microsoft Settlement

Please accept Microsofts terms and conclude this case. We should have used our resources to pursue the foreign countries that pirate our software, games, music, movies and technology in general. We are fortunate that MS has not relocated his business to another country as I would have done if I were Mr. Gates.

We have lost our manufacturing sector. Protect the "information society" assets we have left. We should have allocated our E Business and personal computer technologies worldwide as OPEC does oil. Dale Flanigan 440-975-1111
